PB100G24AC Ver 2.0.11 Quick Start Guide

1. Connect serial port to unit with the included serial cable. Serial parameters are as follows:

baud rate:	115200
parity:	N
data bits:	8
stop bits:	1

2. After the PB100G24AC is finished booting, set the management IP address:
   Switch> enable

3. Setting up the Ethernet management port: (the default management ip is 10.10.10.1)
   Switch# configure terminal
   Switch(config)# management ip address 192.168.1.31/24

4. Go to Firefox or Chrome and type in the ip address and see the following screen:

Login to the system using **admin/gtadmin1**
