

Compliance Statement

Network TAPs Environmental Compliance

A Company-Wide Dedication To Environmental And Quality Standards

Garland Technology is dedicated to more than providing better network design with superior network TAPs. We are fully committed to adhering to the strictest criteria for regulatory standards compliance. We strive to fulfill rigorous qualifications to best serve our community, customers, partners, employees, and more. Garland Technology has full certification under RoHS3, SVHC, REACH, and WEEE.

RoHS3

RoHS3 is Directive (EU) 2015/863 which amends RoHS2 that was adopted by the European Council in 2011. RoHS3 adds four new restricted substances - all phthalates. The four phthalates are mainly used as insulation plasticizers, and are on the REACH list of SVHC (Substances of Very High Concern).

SVHC

Garland Technology's network TAPs and other products do not contain Substances of Very High Concern.

REACH

REACH took effect on June 1, 2007, and is the European Community Regulation on chemicals and their safe use. It requires the Registration, Evaluation, Authorization, and Restriction of CHEMICAL substances. REACH protects human health and the environment through the better and earlier identification of relevant chemical substances. REACH also encourages innovation and competition among businesses to improve safety.

WEEE

The European WEEE Directive puts specific responsibilities on companies to handle Waste of Electronics and Electrical Equipment. The major goal is to reduce the waste arising from electrical and electronic equipment, as well as improve the environmental performance of those involved in the life cycle of electrical and electronic products. The WEEE Directive covers both consumers and professional organizations. It affects those involved in manufacturing, selling, distributing, recycling, and treating of electrical and electronic equipment.

NOM

Normas Oficiales Mexicanas (NOMs), are legal enforcement documents regulating products, processes, or services that may constitute a safety or health risk for people, animals, plants, or the environment in general.
