I3GRE Encapsulate

Overview:

When a packet is encapsulated with an I3GRE header the original Ethernet II segment is removed from the packet and the new GRE header segments are added. The I3GRE header segments consist of Ethernet II, IPv4, and GRE as shown below.

Original Packet

I3GRE Encapsulated Packet

Encapsulating a packet with an I3GRE header involves two configuration processes.

1. Create a Flow
2. Create a Tap Group

1. Create a Flow

The flow defines which packets will be encapsulated with an I3GRE header. Packets that do not meet the flow attributes will not be encapsulated. In some cases, it may be required to create more than 1 flow.

1. Select Tap Management.
2. Select Flow.
3. Select + Add Flow.

The Add Flow panel will appear.

Add Flow

Flow Name: GRE

Decap: off

Add Flow Close

4. Enter the Flow Name.
5. Select Add Flow.

The flow will be displayed.

TAP Flow Statistics

#	Flow Name	Remark	Decap	Options
1	GRE	N/A	Disable	+

+ Add Flow

6. Select the + in the Options column for the desired flow to define the flow attributes.

The Add Flow Entry panel will be displayed.

7. Under Match Rule select the desired options and enter the desired values to define which packets are encapsulated with an I3GRE header. If desired the default options may be used to encapsulate all packets.

8. Under Action, select Add I3gre.

9. Enter the desired L3gre-src-ip. This defines the Source IP in the IPv4 segment of the I3GRE header.

10. Enter the desired L3gre-dest-ip. This defines the Destination IP in the IPv4 segment of the I3GRE header.

11. Enter the desired L3gre-dst-mac. This defines the Destination MAC in the Ethernet II segment of the I3GRE header.

12. Select OK.

2. Create a Tap Group

The Tap Group defines the ingress port, ingress flow, and egress port.

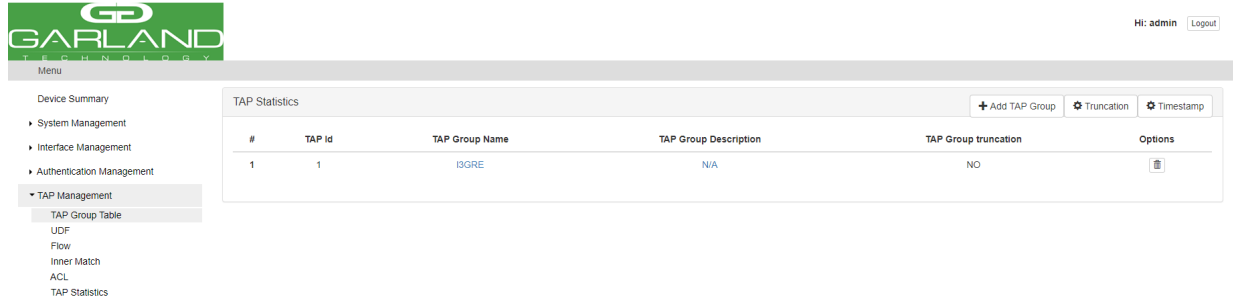

1. Select Tap Management.
2. Select TAP Group Table.
3. Select + Add TAP Group.

The TAP Group Name panel will appear.

The screenshot shows a modal window titled "TAP Group Name" with a close button (X) in the top right corner. Inside the window, there are two input fields: "TAP Group Name" containing the text "I3GRE" and "TAP Group ID" containing the text "0". At the bottom right of the window, there are two buttons: a blue "OK" button with a checkmark icon and a red "Close" button with an X icon.

4. Enter the TAP Group Name.
5. Select OK.

The Tap Group will be displayed.

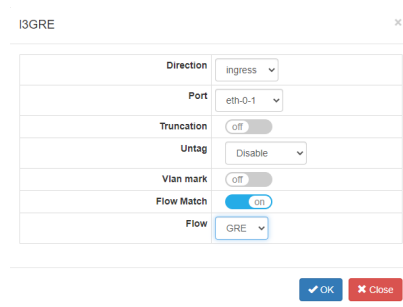

- Place the cursor on the tap group name under the TAP Group Name column and press the left mouse button.

The TAP group panel will appear.

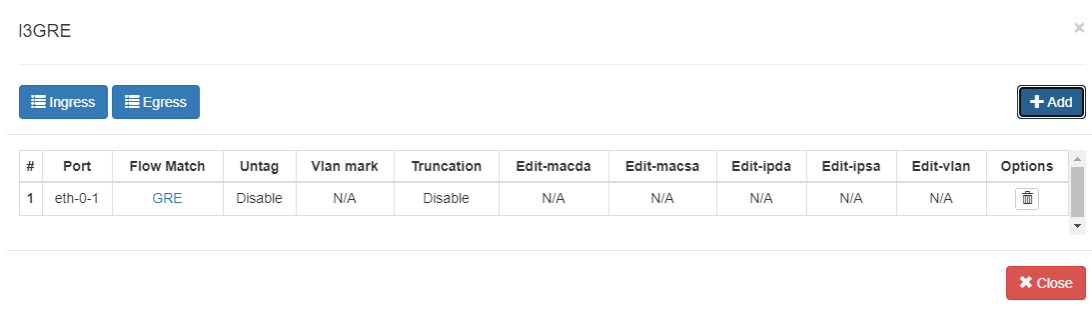

- Select the + Add to define the ingress port and ingress flow.

The add panel will appear.

- Select the Direction, ingress.
- Select the desired ingress port.
- Enable Flow Match.
- Select the I3GRE flow.
- Select OK.

13. Select the + Add to define the egress port.

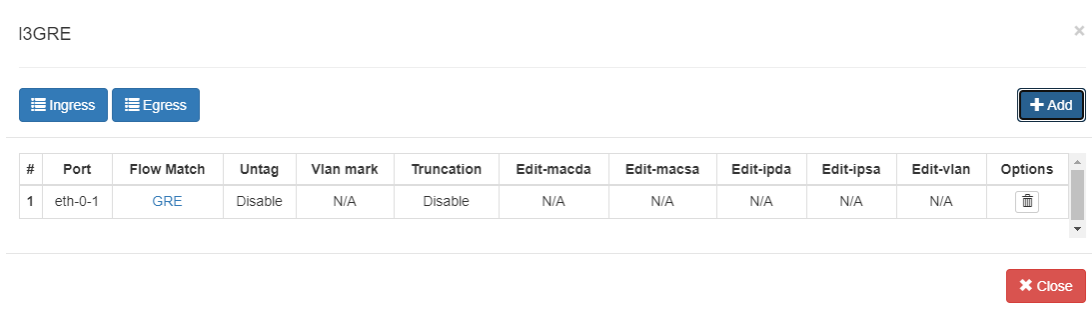

The add panel will appear.

14. Select the Direction, egress.

15. Select the desired egress port.

16. Select OK.

17. The ingress port, ingress flow, and egress port may be displayed by selecting Ingress or Egress. Additional ingress ports, ingress flows, or egress ports may be added to the Tap Group using the same steps.

18. Select Close to return the TAP Group Table display.

I3GRE Decapsulate

Overview:

When an I3GRE packet is decapsulated the I3GRE header segments are removed from the packet. A new Ethernet II segment is added as shown below.

L3GRE Encapsulated Packet

I3GRE Decapsulated Packet

Decapsulating the I3GRE header from a packet involves two configuration processes.

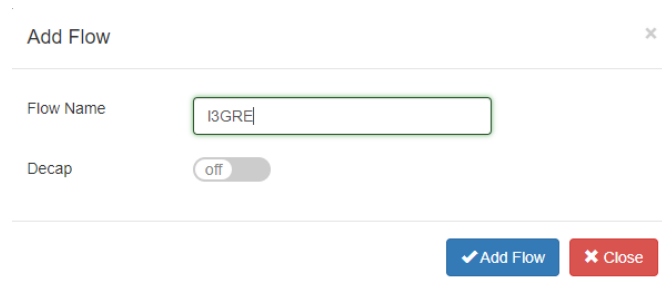

1. Create a Flow
2. Create a Tap Group

1. Create a Flow

The flow defines which I3GRE packets will be decapsulated. Packets that do not meet the flow attributes will not be decapsulated. In some cases, it may be required to create more than 1 flow.

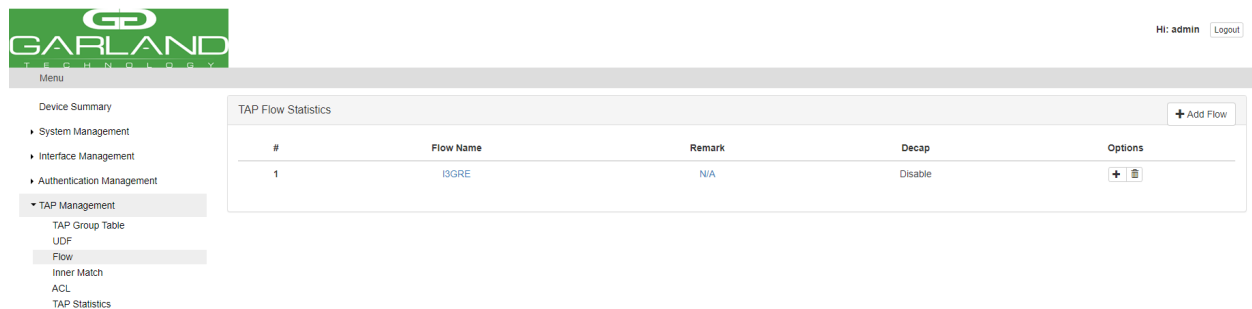

1. Select Tap Management.
2. Select Flow.
3. Select + Add Flow.

The Add Flow panel will appear.

4. Enter the Flow Name.
5. Select Add Flow.

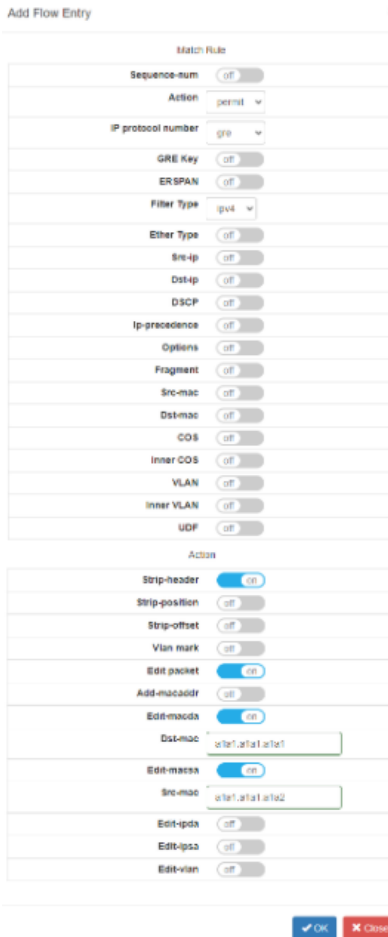

The flow will be displayed.

#	Flow Name	Remark	Decap	Options
1	I3GRE	N/A	Disable	+ [icon]

6. Select the + in the Options column for the desired flow to define the flow attributes.

The Add Flow Entry panel will be displayed.

7. Under Match Rule select gre for the IP Protocol Number.

8. Select the other desired options and enter the desired values to define which I3GRE packets are decapsulated. The defaults may be used to decapsulate all I3GRE packets.

9. Under Actions enable Strip-header.

10. Enable Edit packet.

11. Enable Edit-macda.

12. Enter the desired Dst-mac. This will define the Destination MAC for the new Ethernet II segment added to the packet.

13. Enable Edit-macsa.

14. Enter the desired Src-mac. This will define the Source MAC for the new Ethernet II segment added to the packet.

15. Select OK.

2. Create a Tap Group

The Tap Group defines the ingress port, ingress flow, and egress port.

1. Select Tap Management.
2. Select TAP Group Table.
3. Select + Add TAP Group.

The TAP Group Name panel will appear.

TAP Group Name ✕

TAP Group Name

TAP Group ID

4. Enter the TAP Group Name.
5. Select OK.

The Tap Group will be displayed.

The screenshot shows the Garland Technology web interface. On the left is a navigation menu with 'TAP Management' expanded to show 'TAP Group Table'. The main content area displays 'TAP Statistics' with a table containing one entry for TAP Group Name 'I3GRE'. There are also buttons for '+ Add TAP Group', 'Truncation', and 'Timestamp'.

#	TAP Id	TAP Group Name	TAP Group Description	TAP Group truncation	Options
1	1	I3GRE	N/A	NO	

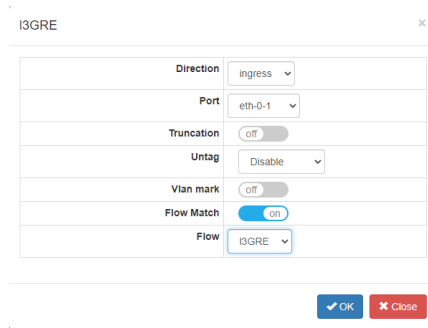

6. Place the cursor on the tap group name under the TAP Group Name column and press the left mouse button.

The TAP group panel will appear.

7. Select the + Add to define the ingress port and ingress flow.

The add panel will appear.

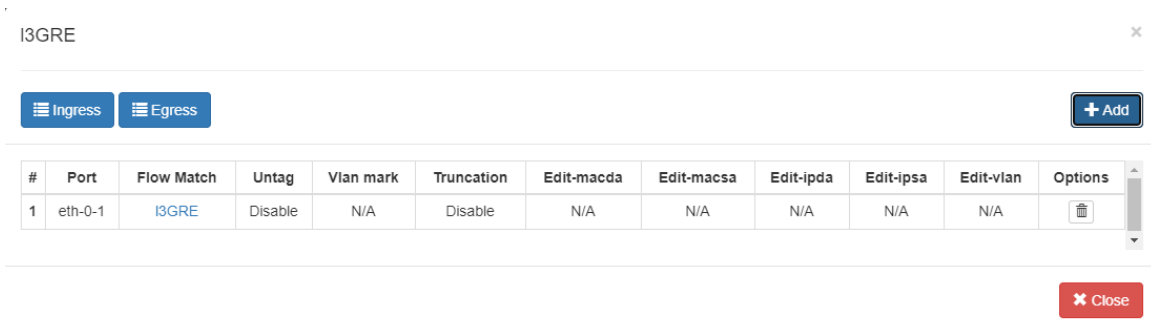

8. Select the Direction, ingress.

9. Select the desired ingress port.

10. Enable Flow Match.

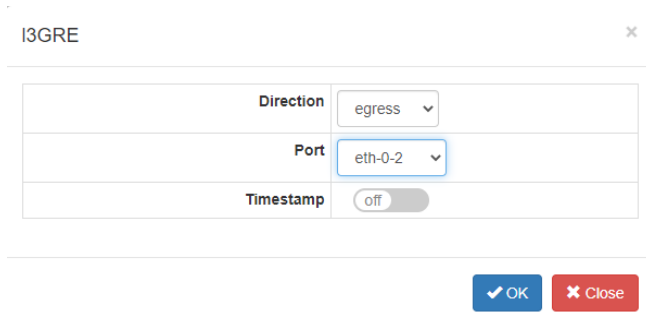

11. Select the I3GRE flow.

12. Select OK.

13. Select the + Add to define the egress port.

The add panel will appear.

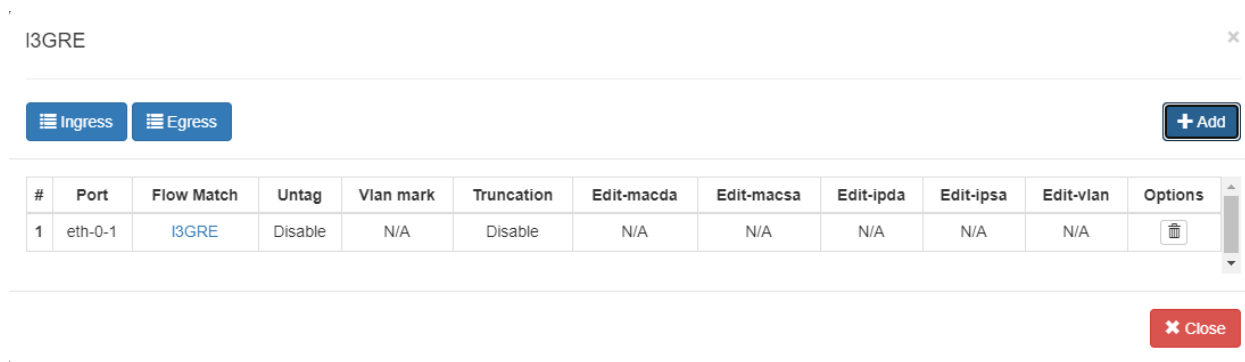

I3GRE

Direction	egress
Port	eth-0-2
Timestamp	off

14. Select the Direction, egress.

15. Select the desired egress port.

16. Select OK.

I3GRE

#	Port	Flow Match	Untag	Vlan mark	Truncation	Edit-macda	Edit-macsa	Edit-ipda	Edit-ipsa	Edit-vlan	Options
1	eth-0-1	I3GRE	Disable	N/A	Disable	N/A	N/A	N/A	N/A	N/A	

17. The ingress port, ingress flow and egress port may be displayed by selecting Ingress or Egress. Additional ingress ports, ingress flows or egress ports may be added to the Tap Group using the same steps.

18. Select Close to return the the TAP Group Table display.
