

End-to-End SDN Visibility Solution

Create a Foundation of Visibility with Garland's network TAPS, cables and pluggables, Edgecore's bare metal switches and Big Switch Network's Big Monitoring Fabric™ software. SDN solutions need reliable data to ensure 100 percent visibility to both the control plane and the data plane. Garland's passive fiber optical TAPs ensure all the data - every bit, byte, and packet® feeds the the solution. Garland network TAPS are tested, certified, and deployed globally for 1/10/25/40/100G enterprise networks.
