**AggregatorTAP**: Passive

100M | Stack Design | Aggregation and Power over Ethernet (PoE)

Network test access points (TAPs) are hardware tools that allow you to access and monitor your network. TAPs are purpose-built hardware devices that let you see every bit, byte and packet.®

AggregatorTAPs are used to capture 100% full duplex traffic that can then be sent to multiple monitoring appliances to analyze your network. This AggregatorTAP supports aggregation and regeneration/SPAN modes, providing flexibility to manage your network.

**Key Features**

- Passive 100M
- Two (2) 1G Aggregated Monitoring ports
- Aggregation-mode only
- Media: Dual-row, 8 circuits, copper, copper alloy base, gold flashed
- Stack design with board to board connectors
- Supports Power over Ethernet (PoE)
- Supports jumbo frames and passes physical errors
- Single external power supply
- 100% secure and invisible; no IP address, no MAC address; cannot be hacked
- Tested and Certified

**APPLICATIONS:**
- PC104 Interconnect standard for embedded industrial technology.
- TAP once and send to multiple monitoring devices.
- Capture full duplex traffic from both directions.

**SOLUTIONS:**
AggregatorTAPs are ideal for:

- Wireshark
- Analyzers
- Intrusion Detection System
- Application Performance Monitoring
- Lawful Intercept
- Packet Capture
- Data Forensics

**Competitive Edge**

- Completely passive
- Tested and Certified
