

DATA SHEET

PacketMAX™ Advanced Aggregator

1U Half-Rack network traffic aggregator.

The PacketMAX™ Advanced Aggregator provides full capabilities in half the size of a traditional Aggregator. Leverage aggregation, filtering, load balancing, and replication inside networks that may not require full-size, data center-style hardware. Ten (10) versatile SFP+ ports work with both 1G and 10G network speeds. The 1U Half-Rack chassis has a compact footprint and is ideal when space for network equipment is constrained. Straightforward set-up and configuration, this Aggregator is ready to consolidate monitored links and deliver preferred Layers 2, 3, and 4 traffic to network monitoring and security tools. Best of all, there are no license or port fees - ever.

Deployment Benefits

Advanced Aggregator

- Aggregate network traffic from one or multiple network links to a single tool or multiple tools (1:1, 1:N, N:1, N:N).
- Combine Aggregator with network TAPs to reduce network complexity.
- Reduce the quantity of monitor links to a number that is more manageable for the out of band network tool or tools.
- Take data from multiple ports and combine the data to a single port before sending to a connected tool.
- Load balance to evenly distribute copies of network traffic sent to connected tools.
- Filter layers 2, 3, and 4 traffic.
- Deliver desired traffic to tools and filter out traffic that is not needed.
- Access the data needed, when it is needed.
- Free up ports on an existing Network Packet Broker to save money on port renewal fees.
- Use copper or optical SFP+ modules in the ten (10) SFP+ Ports.
- Manage 1G and 10G network speeds in a single chassis.
- Upgrade network speeds from 1G to 10G.
- Add new out of band monitoring or security tools in the future.

Management

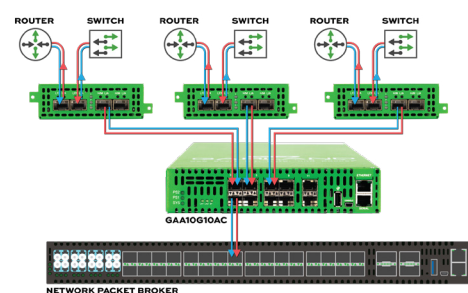

- Includes a management GUI that is effective and simple to use.
- Drop and drag interface to configure functions and set-up filters.
- Restful API for integrations.
